Kære Niels Sandø og Hanne Vibjerg,

Jeg fremsender hermed et nyt studie af snus og psykiske problemer.

Studiet er udført af de anerkendte norske forskere Lars Lien, Ingeborg Bolstad og Jørgen G. Bramness.

<https://harmreductionjournal.biomedcentral.com/articles/10.1186/s12954-024-01077-9>

Konklusionen er bl.a.:

- Previous studies have shown conflicting results regarding the potential harm reduction effect of snus use among patients with AUD who smoke regarding their tobacco use, quality of life and mental health problems. This study suggests that snus use could also be a viable alternative to smoking for patients with addictions.

Med venlig hilsen

Christopher Arzrouni
